

Paulo Pinho

Senior Full-Stack Developer · AI & Web Platforms

22 September 2026

Dear [Hiring Manager],

I am applying for the **[Role Title]** position at **[Company]**. I am a full-stack developer with **10+ years** building and shipping web platforms in fintech, AI, blockchain, e-commerce and entertainment, and I work end to end: React, Next.js and TypeScript on the front end; Node.js, PHP/Laravel and ASP.NET Core on the back end; SQL and data modelling underneath.

Two things I would bring to **[Company]** from day one. First, **production AI experience, not just AI enthusiasm**: at Miew I build real-time conversational interfaces with LangChain, RAG and WebSockets, streaming low-latency LLM responses to production users on fintech and AI platforms such as daskapital.eu and koltena.com, and I have adopted agentic AI workflows to ship faster without lowering the bar on code quality.

Second, the range to **own a feature from the database to the pixels**. My career began in backend and data, designing schemas and building .NET/SQL systems at Prologica, then high-traffic PHP/Laravel portals at Braver that had to withstand festival ticket-launch spikes. That grounding is why I can design the data model and the interface, and why I care about both correctness and frame rate. At RealFevr I built high-concurrency, state-heavy React/Next.js marketplaces for thousands of daily active users, and as a freelancer I have improved clients' Core Web Vitals by 25-40+ points. I also build for craft and performance: hotdogtor.com is a live WebGL/WebGPU portfolio I designed and shipped, rendering in real time and holding 60fps across devices.

I am looking for a senior full-stack role where I can own delivery, mentor other engineers (I set code-review standards and mentor junior engineers and trainees at Miew), and keep learning at the AI edge. I am based in Porto (CET/GMT+1), I am an EU citizen so no sponsorship is required, and I work well with distributed teams across time zones.

I would welcome the opportunity to walk you through my work and talk about where **[Company]** is headed. Thank you for your time and consideration.

Warm regards,

Paulo Pinho
